# SITUATION SUMMARY

## CDPH Ebola Situational Update

### **National**

One of two U.S. doctors with Ebola wishing treatment in the United States arrived at Emory Hospital in Atlanta, Georgia yesterday, 08/02/14. Emory is one of four healthcare facilities in the United States with specialized isolation, as the isolation rooms at Emory incorporate design features which improve the ability to reduce exposure. However, the CDC states that any hospital with isolation rooms has the capability to treat Ebola virus disease patients.

The three other facilities in the Nation with specialized containment are:

- The National Institutes of Health in Bethesda Maryland
- University of Nebraska Medical Center in Omaha
- Saint Patrick's Hospital in Missoula Montana

### **California**

The risk of Ebola importation into California is very low.

The California Department of Public Health (CDPH) will be actively working with the healthcare community and local health departments in protecting the people of the state from possible Ebola importations.

The key CDPH objective for Ebola prevention is early identification of potential cases and avoiding spread of the disease.

CDPH will shortly be distributing information to local health departments and health care providers in California that will help them manage recent travelers to the region. CDC infection control guidelines which were released today by CDC will be included.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

A persistent weather pattern will remain in place into the coming week. There will be a slight chance of thunderstorms across the eastern mountains each afternoon and evening into the middle of next week. Otherwise, the interior can expect above normal temperatures while the coast should anticipate overnight low clouds and fog.

#### **San Francisco Weather:**

A cooling trend will continue today as a much deeper marine layer allows cool marine air to flow inland. Subtropical moisture will increase across the area through Tuesday. This will result in occasional mid and high level clouds and perhaps some sprinkles or light showers on Monday night and Tuesday, mainly across the North Bay.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

The forecast area will have a gradual cooling trend through Tuesday with near average highs through the week. A return of Sierra showers and thunderstorms will start this afternoon and there will be more widespread and wet mountain showers and thunderstorms Monday and Tuesday, with a slight chance of northern valley and foothill storms and southern valley sprinkles. Some showers and thunderstorms may linger over the crest Wednesday and Friday.

#### **Hanford Weather:**

Monsoonal moisture will continue to surge north bringing at least a slight chance of showers and thunderstorms to much of the forecast area through the afternoon hours. Thunderstorm activity will shift to the higher elevations late tonight into early Monday. Otherwise, near normal daytime high temperature will be present over the region through the end of next week with a slight chance of thunderstorms over the Sierra Crest each afternoon.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Monsoonal moisture will continue to bring a slight chance to chance of showers and thunderstorms to all of Los Angeles County, as well as the Ventura County Mountains through Sunday. Night and morning low clouds will affect much of the coast through next week.

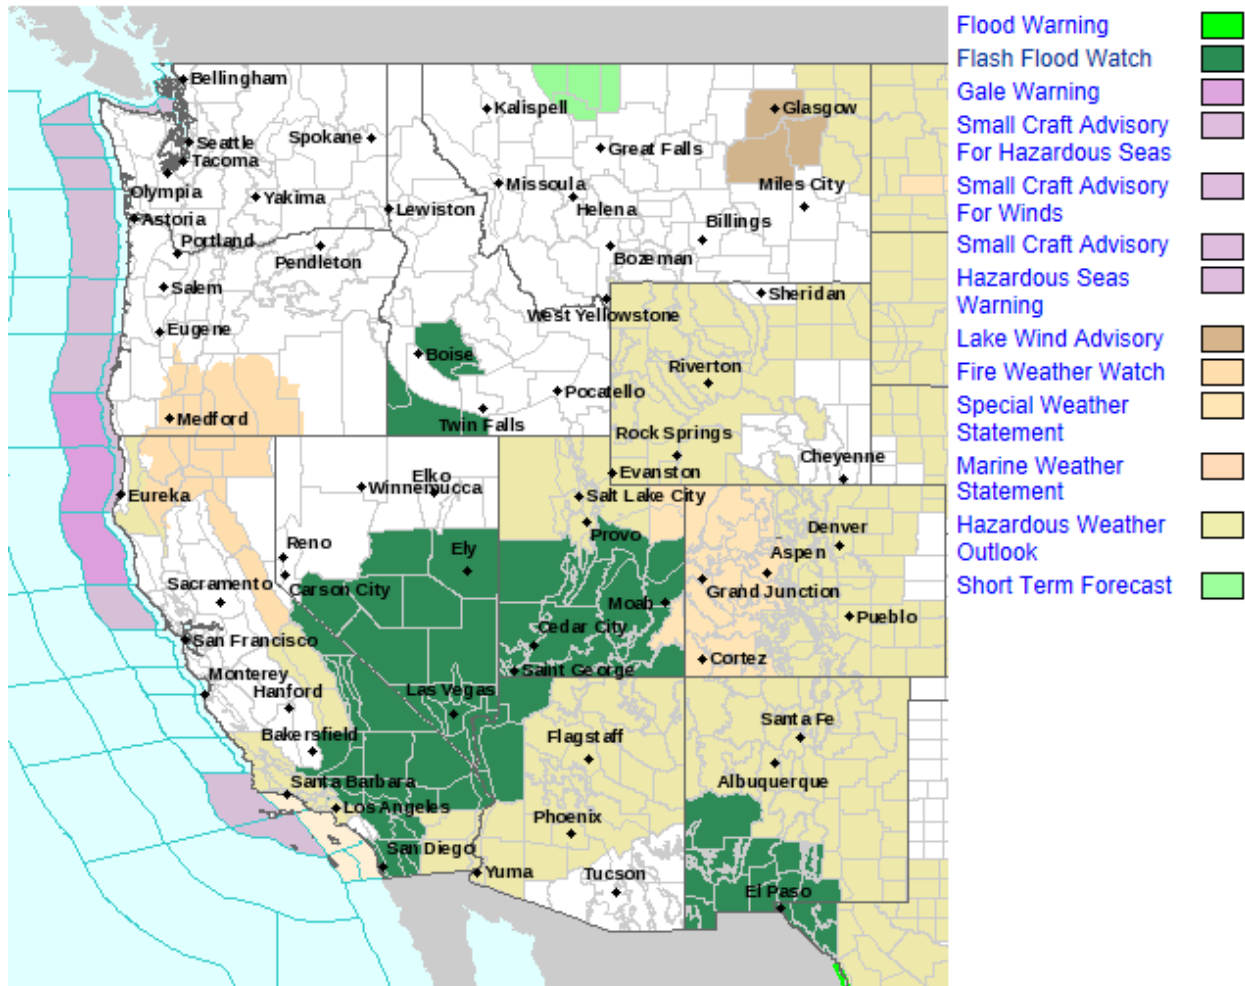

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Another active day of showers and thunderstorms is forecast today with isolated flash flooding possible over most areas. Dry conditions will develop late tonight through the week as a trough anchors along the West Coast. Night and morning low clouds and fog will develop along the coast and over the western valleys with near to slightly below high temperatures forecast. Winds over the mountains and deserts will be breezy in the afternoons and evenings throughout the work week.

#### **Southeast California Weather:**

Expect less cloudiness this morning before thunderstorm activity begins to develop in the afternoon as an upper low continues to affect the region today. For the lower deserts, best chances of thunderstorms will be over southeast California. Storm chances for the forecast area will trend down on Monday as the low shifts northward and weakens. Anticipate a gradual return of storm chances from east to west during the latter half of the week.

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

## **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

### Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.
